PROVIDENCE ENT

A TRADITION OF EXCELLENCE
A COMMITMENT TO CARING

...are right here at Providence ENT

If you or your children suffer from sinus problems, thyroid issues, hearing loss, chronic snoring, allergies, or another condition of the head or neck, turn to Providence ENT for expert solutions.

Our practice has proudly served Delaware County, Chester County and Main Line residents for over four decades. In fact, our team of board-certified otolaryngologists brings patients more than 100 years of combined **EXPERIENCE**, and a level of specialized **SKILL** that will truly inspire your trust.

We are proud to offer a wide array of state-of-the-art equipment and techniques. We also bring you unsurpassed **DEDICATION** – listening carefully and working to pinpoint and resolve your health issues promptly. Above all, you will find the genuine **WARMTH** and **COMPASSION** you and your family truly deserve.

INNOVATIVE SOLUTIONS FOR YOUR NASAL AND SINUS PROBLEMS

Nasal and sinus obstructions can be caused by a variety of conditions, including common colds, bacterial infections, allergies or structural blockages. Our specialists work to quickly understand the source of your problem and offer you a solution that provides fast, lasting relief. Treatments include:

- **Medication** – Our team ensures that you receive the right medication to effectively treat your specific condition.
- **Minimally Invasive Endoscopic Sinus Surgery** – This 3-D, image-guided procedure is extremely safe and accurate, so you and your children can enjoy excellent results and a faster recovery.
- **Balloon Sinuplasty** – A minimally invasive procedure that uses a small, flexible balloon catheter to open up blocked sinus passageways, quickly restoring normal drainage and function.
- **Septoplasty** – Used to correct a deviated septum for dramatically improved nasal breathing.
- **Turbinate Reduction** – Effectively reduces the lateral nasal structures that can interfere with nasal airflow.

SPECIAL ATTENTION FOR PEDIATRIC PATIENTS

Our team gives children the gentle care they need and the exceptional time and attention they deserve. Over the years, we have successfully performed thousands of procedures for common childhood issues of the head and neck, including:

- Tonsillectomy
- Adenoidectomy
- Ear Tube Surgery
- Endoscopic Sinus Surgery
- Septoplasty
- Nasal Fracture Surgery

EXPERT CARE FOR HEARING AND BALANCE DISORDERS

Our team of experienced and certified audiologists perform extensive hearing and balance evaluations. Each evaluation is tailored to meet individual needs and budgets.

Providence Hearing Aid Center offers a wide variety of the latest digital hearing instruments including the new mini behind the ear aids and implantable bone conduction hearing devices.

Taking steps to improve your hearing can make social interactions with friends and family more enjoyable and can dramatically improve your quality of life.

HIGHLY SKILLED EVALUATION AND TREATMENT OF HEADACHES

Headaches are common but determining their true cause can sometimes be challenging. Many conditions can masquerade as a sinus headache. Determining the cause of your headache is important in creating an appropriate treatment plan on your way to long-lasting relief.

Our familiarity with managing sinus and allergy headaches allows us to clearly determine your headache type in order to customize your treatment.

DISCOVER COSMETIC ENHANCEMENT FROM OUR TRUSTED, EXTENSIVELY TRAINED EXPERTS

If you are looking to enhance your appearance, look no further than Providence Facial, Plastic and Cosmetic Surgery, a division of Providence ENT. Our team of specialists includes a board certified facial plastic surgeon with experience performing a wide range of cosmetic procedures. With our extensive knowledge and specialized training in facial anatomy and surgery, you will benefit from a level of expertise that is difficult to find anywhere else. Providence Facial, Plastic and Cosmetic Surgery services include:

- Rhinoplasty
- Chin Implants
- Facelifts
- Otoplasty
- Eyelid Rejuvenation
- Facial and Body Liposuction
- Brow Lift
- Fat Transfer

Cosmetic procedures that are performed conveniently in our office include:

- Botox Cosmetic
- Hair Removal/Tattoo Removal
- Facial Fillers (Juvederm and Radiesse)
- Facial Resurfacing
- Scar Revision
- Eyelash Thickening

LEADING THE WAY IN ALLERGY TESTING AND TREATMENT

Providence ENT provides expert solutions for allergies using the latest technology and patient-friendly care. Our team performs a thorough evaluation to determine the source of your allergies, and then provides a customized treatment program for fast, lasting relief. Your treatment may include:

- **Medication** – We will work closely with you to determine the most effective allergy medications for your symptoms.
- **Subcutaneous Immunotherapy (shots)** – A series of shots used to reduce the sensitivity to allergens allows patients to achieve long-term relief of symptoms and elimination of allergy medication.
- **Sublingual Immunotherapy (SLIT)** – This allergy treatment uses drops placed under the tongue instead of shots. It is an ideal option for patients who cannot tolerate shots – particularly children. This method offers convenience for busy professionals, college students and travelers. You can take the medicine at home, and far fewer office visits are required.

ESSENTIAL TREATMENT FOR THYROID, PARATHYROID, HEAD AND NECK CONDITIONS

Our board certified head and neck surgeons are among the most experienced in the region. They lead the way in pioneering innovative procedures utilizing less dissection, which results in reduced post-operative pain and a faster recovery time. They provide:

- Minimally-invasive thyroid and parathyroid surgeries
- Microsurgery of the larynx
- Salivary gland surgery with nerve monitoring
- Treatment for benign and malignant head and neck tumors
- Removal of benign, congenital and pediatric neck masses

SOUND SOLUTIONS FOR SNORING AND SLEEP APNEA

Loud, chronic snoring can be caused by nasal congestion, large tonsils or an enlarged tongue. Snoring can also be a sign of a serious medical condition called obstructive sleep apnea.

Whether you are seeking help for the first time or have tried other snoring treatments without success, the Providence ENT team offers the expertise you need to achieve lasting relief.

Your evaluation may include a sleep study during which your overnight sleep patterns are monitored and analyzed. Snoring and sleep apnea treatments include:

- **Uvulopalatopharyngoplasty (UPPP)** – Used to remove tissues in the throat that block the airways.
- **Tongue Base and Hyoid Suspension** – A minimally invasive procedure that prevents the tongue from obstructing the back of the throat.
- **Laser-Assisted Uvuloplasty (LAUP)** – Uses a laser to sculpt the soft palate and uvula to reduce snoring.
- **The Pillar Procedure** – A minimally invasive procedure that places 4-5 tiny inserts in the soft palate to help block the vibrations that cause snoring.
- **Septoplasty** – Used to correct a deviated septum for dramatically improved nasal breathing.
- **Turbinate Reduction** – Effectively reduces the lateral nasal structures that can interfere with nasal airflow.
